

Introducing

Safeway Out Lite

“Saving lives for every lighted path”

TARGET MARKET:

- Police
- Firefighters
- Search and Rescue

FEATURES:

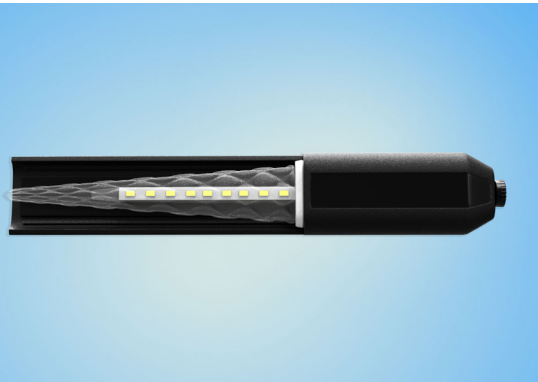

- Glue Strip
- Control turn knob
- Knob port

PATENT INFORMATION:

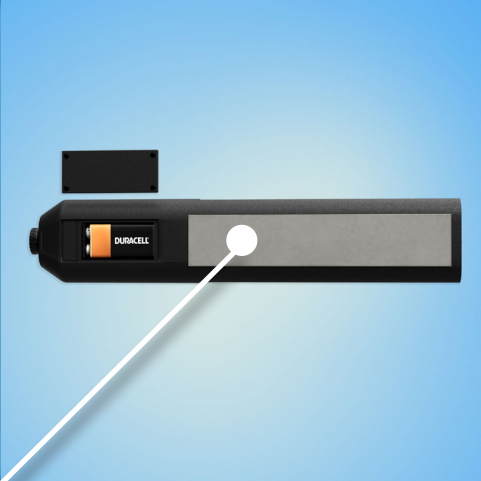

Patent pending.

SUMMARY:

The Safeway Out Lite is a 12-inch-long by 1-inch-wide light that is 1 inch in height with an on/off control turn knob at the end. The light itself is in a 9-inch-long crystal tube containing one 8-inch-long SEQUENTIAL LED flashing light strip. This clear tube is attached to the 2-inch-long battery assembly and the aforementioned on/off control switch. The battery assembly clamps around the crystal tube, creating a water-resistant seal. The Safeway Out Lite is powered by one 9-VOLT battery and held together by 4 evenly placed screws, thus allowing the battery to be replaced every 6 months (LIKE YOUR

SMOKE DETECTOR). The Safeway Out Lite has one last item on the back bottom or underside: a strip of very tacky and super sticky glue. When peeled and attached, it's designed to be there forever. The Safeway Out Lite is a ONE-TIME-USE PORTABLE PERSONAL DEVICE that, when used with other accepted, proven SEARCH and RESCUE TACTICS, will prove itself over and over again. In short, it's a device that is carried into a fire and deployed on the floor or wall. In an all Sally, we gotta go now situation, there would be NO DOUBT ABOUT THE OUT. KNOW THE WAY OUT LITE.

About the Developer

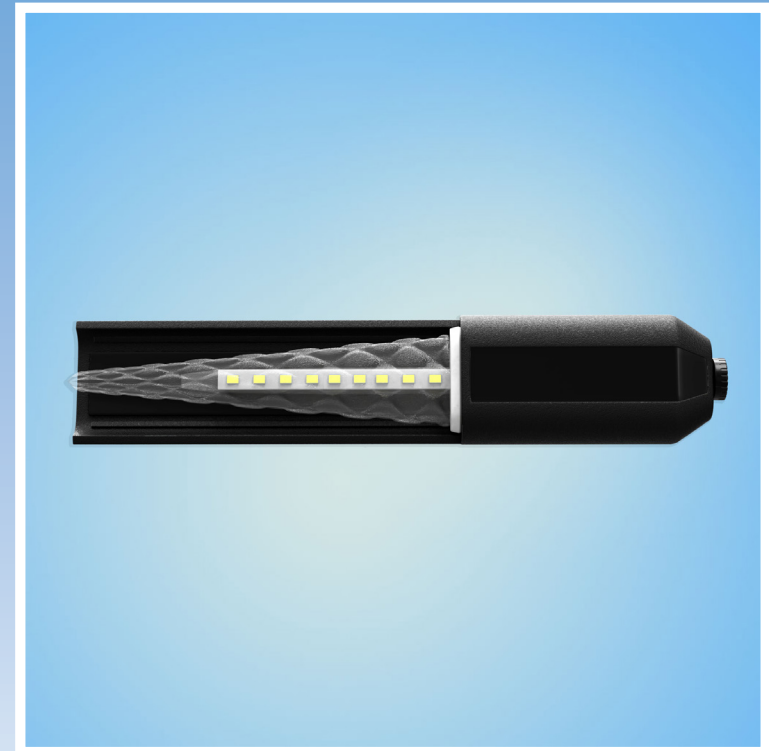

Gregory came up with this idea when a lot of firefighters lost their lives because they couldn't find their way out from a burning building. He contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for royalty. Working with Mars Rising Network, this essential new design concept was refined and prepared to be presented as a commercial product.
